Why do I have black boxes appearing all over my screen?

Marc Ferrell - 2014-02-25 - in [Troubleshooting](#)

Why do I have black boxes appearing all over my screen and how do I fix this?

The black boxes are tied to AMD graphics on a Mac machine.

To get rid of the black boxes you will need to go into the graphics menu, then click the "Advanced Settings" button.

Once in the "Advanced Settings" menu disable "Motion Blur", this should fix the issue.
